

TO WHOM IT MAY CONCERN

This letter is to confirm the outcomes for certified organic producers certified to the Australian Certified Organic Standard (ACOS) and the National Standard for Organic & Biodynamic Produce, in the event their property(s) is/are affected by the mandatory Red Fire Ant baiting program.

In the event of Red Fire Ant Baiting occurring on a certified property, please contact the ACO office with the following information:

1. Date of baiting
2. Copy of the notification of intent to bait (if any)
3. Map of the affected area
4. Details of any crop grown

Land under fallow will not be affected.

Generally, any crop growing on certified organic land at the time of baiting, will lose its certified organic status for that growing season. The certified land, however may be unaffected and remain certified.

Having said this, all notifications will be assessed on a case by case basis.

If unsure of your status, please contact the ACO office on 07 3350 5706.

Yours sincerely

Ben Copeman
CEO
